The Fund files its complete schedule of fund holdings with the Securities and Exchange Commission (the "Commission") for the first and third quarters of each fiscal year on Form N-Q or as an exhibit to its reports on Form N-PORT within sixty days after the end of the period. The Fund's Forms N-Q and Form N-PORT reports are available on the Commission's website at <http://www.sec.gov>, and may be reviewed and copied at the Commission's Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities, as well as information relating to how the Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30, is available (i) without charge, upon request, by calling 1-866-342-7058; and (ii) on the Commission's website at <http://www.sec.gov>.

SHAREHOLDERS' LETTER (UNAUDITED)

July 31, 2021

Dear Shareholder:

As you know, we invest primarily in infrastructure sectors such as utilities, telecommunications, and transportation selecting companies from the bottom up via a rigorous and independent research process. Our largest investments tend to have high barriers to entry, predictable business models, and the consistent ability to grow cash flow and return capital to shareholders. The following review includes perspective segregated by sector with performance estimates on a consolidated basis, gross of fees.

Portfolio Review

In the twelve months ended July 31, 2021, the Reaves Utilities and Energy Infrastructure Fund generated the following net-of-fee returns:

RSRFX: 15.80%

This compares to the following:

S&P Global Infrastructure Indexⁱⁱⁱ : 19.82%S&P 500 Utilities Indexⁱⁱ : 12.03%

Over the past year, massive central bank money printing and government directed fiscal stimulus in the developed world helped propel asset prices to new highs. The advance was uneven, however, and spoke to a reevaluation of business drivers in a world where increased amount of economic activity is being conducted digitally, with less in-person contact. This means more demand for communications services and delivery logistics. Growth stocks, particularly large technology companies, substantially outperformed value-oriented companies. This dynamic was evident within our portfolio as communications holdings Alphabet Inc., Charter Communications Inc., and T-Mobile US Inc. made new highs while traditionally defensive companies in the utilities and integrated telecom industries lagged.

We discuss these trends in more detail below.

Communications Infrastructure (45.3% weighting as of 7/31/2021)

The sector generated the majority of the positive returns for the period. While our investments in Alphabet, Charter Communications, and T-Mobile stood out, positive contribution in the space was broad-based. Covid-19 amplified the consumer and enterprise reliance on communications infrastructure. Cable sector performance was notable. As the dominant provider of consumer broadband in the U.S., the sector

benefitted from increased adoption in the home. While investors have increasingly become aware of the non-discretionary nature of the service, the pandemic forced regulators of all of stripes to acknowledge, for the first time, that consumers need broadband at home to participate in the modern economy. For investors, this helped codify valuations. For companies, the significant stimulus and infrastructure support earmarked to improve adoption and deployment of broadband helped lengthen the growth runway. An analogous dynamic played out in enterprise markets, where our data center investments benefitted from being labeled essential services early on during the pandemic. Likewise, enterprises' IT Managers scrambled to provision sufficient bandwidth to enable secure, reliable, remote work for employees. The result was that demand for data center space continued unabated.

During the period, we initiated a position in Liberty Latin America, a predominately cable and wireless business. While recovery in the region will take longer than developed markets, we thought the market had disproportionately punished shares given the non-discretionary nature of the services and the accretive M&A (mergers and acquisitions) which management has executed. We also sold shares of Canadian telco Telus Corp. during the period and used proceeds to purchase shares of Canadian cable operator Shaw Communications. While we admire Telus and view it to be among the best telecom businesses, valuation looked fair. At the same time, Shaw was trading at a steep discount to an offer made by rival Canadian cable provider Rogers Communications. The deal has the potential to change the competitive landscape in Canada for the positive and we believe it will pass regulatory hurdles.

Overall, we remain excited about the long-term growth prospects of our communications infrastructure investments. We believe this is an emerging asset class that will increasingly demand significant exposure from public and private investors alike. The virtualization of the economy remains in the early innings, and we think there is a correspondingly attractive decades-long investment opportunity.

Utilities (31.3% weighting as of 7/31/2021)

Our utility investments failed to keep pace with broader indices as investors favored companies with greater leverage to post-Covid recovery and largely avoided safe havens. This driver was also evident in the underperformance of indices that favor high quality factors and dividend growth.

During the period, we took the opportunity to rationalize our holdings in the sector, exiting California and local gas distribution utilities. Regarding California, while the state has come a long way in crafting a regulatory framework that incentivizes utilities to harden the transmission and distribution infrastructure to the risk of wildfire, wildfires continue to represent financial risk to companies. In the context of drought in the state, that has lasted nine years and shows little sign of abating, we felt

the risks were too high to justify our ongoing investment. Gas utilities were divested because we saw more compelling opportunity elsewhere. While we believe the sector is financially healthy, opposition to all fossil fuel among investors and the public may burden shares.

We redeployed the capital into companies we think can grow more quickly than the industry average. Our purchases are concentrated in states that have progressive regulation and differentiated access to wind and solar resources. We also purchased the shares of Exelon Corp. after an over ten-year absence. The company is the largest operator of nuclear power plants and we believe that there will be more public acceptance of the need to keep the fleet going in order to meet climate goals.

Overall, we remain confident that the long-term outlook for the industry is robust. This is driven by spending associated with transitioning away from fossil fuels. The industry provides essential, non-discretionary services, with consistent growth underwritten by the need for safety and reliability. Additionally, there is a lot of support for an infrastructure bill in the U.S. which should benefit, especially those in offshore wind and water safety development.

Transportation, Logistics and Other (25% weighting as of 7/31/2021)

Extreme supply chain tightness and strong pricing drove our investment performance. Several factors coalesced to create this condition: the post-Covid economic recovery proved robust, ecommerce continued to take share from traditional retail, and there was widespread recognition that inventories need to be structurally higher to meet increasingly stringent delivery timetables. These factors emerged at a time when many logistics companies were still unwinding Covid-era capacity curtailments. The result was very strong pricing for shippers like rail and truck as demand outpaced supply. Additionally, there was unprecedented demand for warehouse space, particularly for space close to end markets. Going forward, some of the cyclical drivers of recent strength should ebb, but the long-term shift towards ecommerce and structurally higher inventories should remain supportive for the sector.

Kansas City Southern was our most significant profit contributor for the period. The company received buyout offers from both Canadian Pacific and Canadian National railroads. We opted to liquidate the position since it is not clear to us that the U.S. regulatory bodies will allow any consolidation in the class 1 rail space, even if it is cross border entities with little asset overlap.

We purchased XPO Logistics Inc. with the proceeds. The company planned to spin out its warehouse contract management business to shareholders as an independent entity. The new company, GXO Logistics Inc., is the first pure play of its kind listed in equity markets and should benefit from warehouse demand as well as capital and efficiency spending. It should also benefit from growth in reverse logistics (returns

of merchandise purchased on-line) which is growing faster than the already fast-growing broader ecommerce market.

Outlook

In communications, we prefer infrastructure businesses with high barriers to entry, predictable business models, and the consistent ability to grow cash flow and return capital to shareholders. Specifically, we favor cable companies given their dominant position in broadband, a business with high rates of cash conversion. Additionally, we think communications real estate investment trusts (REITs) such as towers and retail data centers have developed wide and deep moats, with compelling secular growth drivers such as mobile broadband and cloud computing. We will remain more selective with traditional telecommunications businesses based on relative valuation and nearer term competitive dynamics.

Our utility sector investments are focused on subsectors that have above-average organic growth. In particular, the outlook for water utilities and renewable developers remains very healthy. These companies should be able to raise their dividends at a measured pace and continue to provide stability to the portfolio in the event of unforeseen volatility.

In other infrastructure investments, we prefer businesses that have strategic advantages that translate into above average growth prospects. We are particularly excited about the long-term prospects for efficiency savings in the rail business and ecommerce opportunities in our logistics and industrial REIT investments.

We remain committed to providing you with a portfolio of well-researched, high-quality companies in vital industries that have the ability to grow earnings and dividends while providing substantial defensive characteristics.

Sincerely,

Tim Porter
Chief Investment Officer

Brian Weeks
Portfolio Manager

Performance data represents past performance which is no guarantee of future results. Investment return and principal value will fluctuate so that an investor's shares, when

redeemed, may be worth more or less than the original cost. Mutual fund performance changes over time and current performance may be lower or higher than what is stated. For performance current to the most recent month-end and after tax returns, please call 1.866.342.7058.

The above commentary represents management's assessment of the Fund and the market environment at a specific point in time and should not be relied upon by the reader as research or investment advice. This information should not be relied upon by the reader as research or investment advice regarding the Fund or any stock in particular, nor should it be construed as a recommendation to purchase or sell a security.

Mutual fund investing involves risk, including possible loss of principal. In addition to the normal risks associated with investing, narrowly focused investments typically exhibit higher volatility. There can be no assurance that the Fund will achieve its stated objective.

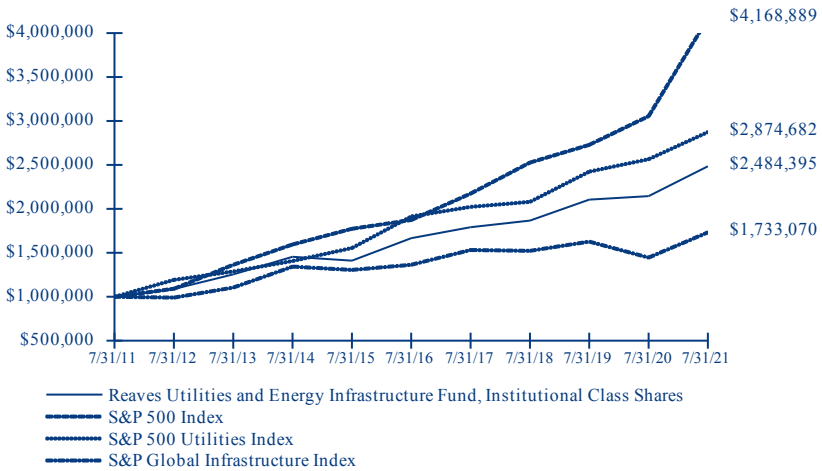

Definition of the Comparative Indices

- ⁱ The S&P 500 Index is a capitalization-weighted index of 500 stocks designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.
- ⁱⁱ The S&P 500 Utilities Index is a capitalization-weighted index containing 30 electric and gas utility stocks (including multi-utilities and independent power producers).
- ⁱⁱⁱ The S&P Global Infrastructure Index is designed to track 75 companies from around the world chosen to represent the listed infrastructure industry while maintaining liquidity and tradability. To create diversified exposure, the index includes three distinct infrastructure clusters: energy, transportation and utilities.

The performance data quoted herein represents past performance and the return and value of an investment in the Fund will fluctuate so that, when redeemed, may be worth less than its original cost. Past performance is no guarantee of future performance and should not be considered a representation of the future results of the Fund.

The Fund's performance assumes the reinvestment of dividends and capital gains. Index returns assume reinvestment of dividends and, unlike a fund's returns, do not reflect any fees or expenses. If such fees and expenses were included in the index returns, the performance would have been lower. Please note that one cannot invest directly in an unmanaged index.

There are no assurances that the Fund will meet its stated objectives. The Fund's holdings and allocations are subject to change because it is actively managed and should not be considered recommendations to buy individual securities.

Returns shown do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares. If the Adviser had not limited certain expenses, the Fund's total return would have been lower.

See definition of comparative indices on page 6.

NOTES TO FINANCIAL STATEMENTS

1. Organization:

The Advisors' Inner Circle Fund II (the "Trust") is organized as a Massachusetts business trust under an Amended and Restated Agreement and Declaration of Trust dated July 24, 1992. The Trust is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company with twenty funds. The financial statements herein are those of the Reaves Utilities and Energy Infrastructure Fund (the "Fund"). The financial statements of the remaining funds of the Trust are presented separately. The investment objective of the Fund is total return from income and capital growth. The Fund is a diversified fund, and invests primarily in securities of domestic and foreign public utility and energy companies, with a concentration (at least 80% of its assets) in companies involved to a significant extent in the Utilities and Energy Industries. The assets of each fund of the Trust are segregated, and a shareholder's interest is limited to the fund of the Trust in which shares are held.

2. Significant Accounting Policies:

The following are significant accounting policies, which are consistently followed in the preparation of the financial statements of the Fund. The Fund is an investment company that applies the accounting and reporting guidance issued in Topic 946 by the U.S. Financial Accounting Standards Board ("FASB").

Use of Estimates — The preparation of financial statements, in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates and such differences could be material.

Security Valuation — Securities listed on a securities exchange, market or automated quotation system for which quotations are readily available (except for securities traded on the NASDAQ Stock Market (the "NASDAQ")), including securities traded over the counter, are valued at the last quoted sale price on an exchange or market (foreign or domestic) on which they are traded on the valuation date (or at approximately 4:00 pm ET if a security's primary exchange is normally open at that time), or, if there is no such reported sale on the valuation date, at the most recent quoted bid price. For securities traded on NASDAQ, the

NASDAQ Official Closing Price will be used. All investment companies held in the Fund's portfolio are valued at the published net asset value.

Securities for which market prices are not "readily available" are valued in accordance with Fair Value Procedures established by the Trust's Board of Trustees (the "Board"). The Trust's Fair Value Procedures are implemented through a Fair Value Committee (the "Committee") designated by the Board. Some of the more common reasons that may necessitate that a security be valued using Fair Value Procedures include: the security's trading has been halted or suspended; the security has been de-listed from a national exchange; the security's primary trading market is temporarily closed at a time when under normal conditions it would be open; the security has not been traded for an extended period of time; the security's primary pricing source is not able or willing to provide a price; or trading of the security is subject to local government-imposed restrictions. When a security is valued in accordance with the Fair Value Procedures, the Committee will determine the value after taking into consideration relevant information reasonably available to the Committee. As of July 31, 2021, there were no securities valued in accordance with the Fair Value Procedures.

In accordance with the authoritative guidance on fair value measurements and disclosures under U.S. GAAP, the Fund discloses the fair value of its investments in a hierarchy that prioritizes the inputs to valuation techniques used to measure the fair value. The objective of a fair value measurement is to determine the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (an exit price). Accordingly, the fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The guidance establishes three levels of the fair value hierarchy as follows:

- Level 1 — quoted prices in active markets for identical securities.
- Level 2 — other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).
- Level 3 — significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments).

During the year ended July 31, 2021, there have been no changes to the Fund's fair value methodologies.

Federal Income Taxes — It is the Fund's intention to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code and to distribute all of its taxable income. Accordingly, no provision for Federal income taxes has been made in the financial statements.

The Fund evaluates tax positions taken or expected to be taken in the course of preparing the Fund's tax returns to determine whether it is "more-likely-than-not" (i.e., greater than 50-percent) that each tax position will be sustained upon examination by a taxing authority based on the technical merits of the position. Tax positions not deemed to meet the more-likely-than-not threshold are recorded as a tax benefit or expense in the current year. The Fund did not record any tax provision in the current year. However, management's conclusions regarding tax positions taken may be subject to review and adjustment at a later date based on factors including, but not limited to, examination by tax authorities (i.e., the last 3 tax year ends, as applicable), on-going analysis of and changes to tax laws, regulations and interpretations thereof.

As of and during the year ended July 31, 2021, the Fund did not have a liability for any unrecognized tax benefits. The Fund recognizes interest and penalties, if any, related to unrecognized tax benefits as income tax expense in the Statement of Operations. During the year ended July 31, 2021, the Fund did not incur any interest or penalties relating to unrecognized tax benefits.

Security Transactions and Investment Income — Security transactions are accounted for on the trade date for financial reporting purposes. Costs used in determining realized gains and losses on the sales of investment securities are based on specific identification. Dividend income is recognized on the ex-dividend date and interest income is recognized on an accrual basis.

Investments in Real Estate Investment Trusts ("REITs") — With respect to the Fund, dividend income is recorded based on the income included in distributions received from REIT investments using published REIT reclassifications including some management estimates when actual amounts are not available. Distributions received in excess of any estimated amount are recorded as a reduction of the cost of investments or reclassified to capital gains. The actual amounts of income, return of capital, and capital gains are only determined by each REIT after its fiscal year-end, and may differ from estimated amounts.

Expenses — Most expenses of the Trust can be directly attributed to a particular fund. Expenses that cannot be directly attributed to a fund are apportioned among the funds of the Trust based on the number of funds and/ or relative net assets.

Dividends and Distributions to Shareholders — The Fund seeks to declare quarterly dividends at fixed rates approved by the Board. To the extent that the amount of the Fund's net investment income and short-term capital gains is less than the approved fixed rate, some of its dividends may be paid from net capital gains or as a return of shareholder capital. To the extent the amount of the Fund's

net investment income and short-term capital gains exceeds the approved fixed rate, the Fund may pay additional dividends. An additional distribution of net capital gains realized by the Fund, if any, may be made annually; provided, however, that no more than one distribution of net capital gains shall be made with respect to any one taxable year of the Fund (other than a permitted, supplemental distribution which does not exceed 10% of the aggregate amount distributed for such taxable year).

3. Transactions with Affiliates:

Certain officers and trustees of the Trust are also officers of SEI Investments Global Funds Services (the "Administrator"), a wholly owned subsidiary of SEI Investments Company, and/or SEI Investments Distribution Co. (the "Distributor"). Such officers and trustees are paid no fees by the Trust for serving as officers and trustees of the Trust.

The services provided by the Chief Compliance Officer ("CCO") and his staff, who are employees of the Administrator, are paid for by the Trust, as incurred. The services include regulatory oversight of the Trust's advisers and service providers as required by SEC regulations. The CCO's services and fees have been approved by and are reviewed by the Board.

4. Administration, Transfer Agent and Custodian Agreements:

The Fund and the Administrator are parties to an administration agreement under which the Administrator provides management and administrative services to the Fund. For these services, the Administrator is paid an asset-based fee (subject to certain minimums), which will vary depending on the number of share classes and the average daily net assets of the Fund. For the year ended July 31, 2021, the Fund was charged \$125,002 for these services.

DST Systems, Inc. serves as the transfer agent and dividend disbursing agent for the Fund under a transfer agency agreement with the Trust. The Fund may earn cash management credits which can be used to offset transfer agent expenses. During the year ended July 31, 2021, the Fund earned credits of \$72, which were used to offset transfer agent expenses. This amount is listed as "Fees Paid Indirectly" on the Statement of Operations.

U.S. Bank, N.A. acts as custodian (the "Custodian") for the Fund. The Custodian plays no role in determining the investment policies of the Fund or which securities are to be purchased or sold by the Fund.

5. Investment Advisory Agreement:

Under the terms of an investment advisory agreement, W. H. Reaves & Co., Inc. (the "Adviser") provides investment advisory services to the Fund at a fee, which is calculated daily and paid monthly at an annual rate of 0.75% of the Fund's average daily net assets. The Adviser has voluntarily agreed to waive a portion of its advisory fees and to assume expenses, if necessary, in order to keep the Fund's total annual operating expenses from exceeding 1.30% of the Institutional Class Share average daily net assets. The Adviser may discontinue the expense limitation at any time. In addition, if at any point it becomes unnecessary for the Adviser to reduce fees or make expense reimbursements, the Adviser may retain the difference between the "Total Annual Fund Operating Expenses" and the aforementioned expense limitations to recapture all or a portion of its prior expense limitation reimbursements made during the preceding three-year period up to the expense cap in place at the time the expenses were waived. As of July 31, 2021, fees which were previously waived and reimbursed by the Adviser which may be subject to possible future reimbursement to the Adviser were \$81,713 expiring in 2022, \$69,899 expiring in 2023, and \$45,520 expiring in 2024. During the year ended July 31, 2021, there has been no recoupment of previously waived and reimbursed fees.

6. Share Transactions:

	<u>Year Ended</u> <u>July 31, 2021</u>	<u>Year Ended</u> <u>July 31, 2020</u>
Share Transactions:		
Institutional Class Shares		
Issued	753,399	1,245,628
Reinvestment of Distributions.....	17,067	269,915
Redeemed	<u>(994,469)</u>	<u>(375,857)</u>
Net Increase/(Decrease) in Shares Outstanding....	<u><u>(224,003)</u></u>	<u><u>1,139,686</u></u>

7. Investment Transactions:

The cost of security purchases and the proceeds from security sales, other than long-term U.S. Government and short-term investments, for the year ended July 31, 2021 were \$21,694,529 and \$22,610,379, respectively. There were no purchases or sales of long-term U.S. Government securities.

8. Federal Tax Information:

The amount and character of income and capital gain distributions, if any, to be paid are determined in accordance with Federal income tax regulations, which may differ from U.S. GAAP. As a result, net investment income (loss) and net realized

**THE ADVISORS' INNER CIRCLE FUND II REAVES UTILITIES AND ENERGY
INFRASTRUCTURE FUND
JULY 31, 2021**

gain (loss) on investment transactions for a reporting period may differ significantly from distributions during such period. These book/tax differences may be temporary or permanent. The permanent differences primarily consist of reclassification of long term capital gain distribution on REITs and reclassification of distribution of ordinary income. There are no permanent differences that are credited or charged to Paid-in Capital and Distributable Earnings as of July 31, 2021.

The tax character of dividends and distributions declared during the fiscal years ended July 31, 2021 and 2020 was as follows:

	<u>Ordinary Income</u>	<u>Long-Term Capital Gain</u>	<u>Total</u>
2021	\$ 149,493	\$ 51,883	\$ 201,376
2020	939,622	2,250,182	3,189,804

As of July 31, 2021, the components of Distributable Earnings on a tax basis were as follows:

Undistributed Long-Term Capital Gains	\$ 2,838,313
Unrealized Appreciation	15,681,986
Other Temporary Differences	<u>2</u>
Total Distributable Earnings	<u><u>\$18,520,301</u></u>

The Federal tax cost and aggregate gross unrealized appreciation and depreciation on investments held by the Fund at July 31, 2021 were as follows:

<u>Federal Tax Cost</u>	<u>Aggregate Gross Unrealized Appreciation</u>	<u>Aggregate Gross Unrealized Depreciation</u>	<u>Net Unrealized Appreciation</u>
\$42,039,683	\$16,321,522	\$(639,538)	\$15,681,984

9. Concentration/Risks:

The Fund has adopted a policy to concentrate its investments (at least 80% of its assets) in companies involved to a significant extent in the Utilities and Energy Industries. To the extent that the Fund's investments are focused in issuers conducting business in the Utilities Industry and/or Energy Industry, the Fund is subject to the risk that legislative or regulatory changes, adverse market conditions and/or increased competition will negatively affect these industries.

Equity Risk – Equity securities include publicly and privately issued equity securities, common and preferred stocks, warrants, rights to subscribe to common stock and convertible securities, interests in MLPs, as well as instruments that attempt to track the price movement of equity indices. Investments in equity securities and equity derivatives in general are subject to market risks that may cause their prices to fluctuate over time. The value of securities convertible into equity securities, such as warrants or convertible debt, is also affected by prevailing interest rates, the credit quality of the issuer and any call provision. Fluctuations in the value of equity securities in which a mutual fund invests will cause the fund's net asset value ("NAV") to fluctuate. An investment in a portfolio of equity securities may be more suitable for long-term investors who can bear the risk of these share price fluctuations. In addition, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund's performance and cause losses.

Foreign Security Risk – Investments in securities of foreign companies or governments can be more volatile than investments in U.S. companies or governments. Diplomatic, political, or economic developments, including nationalization or appropriation, could affect investments in foreign companies. Foreign securities markets generally have less trading volume and less liquidity than U.S. markets. In addition, the value of securities denominated in foreign currencies, and of dividends from such securities, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar. Financial statements of foreign issuers are governed by different accounting, auditing, and financial reporting standards than the financial statements of U.S. issuers and may be less transparent and uniform than in the United States. Thus, there may be less information publicly available about foreign issuers than about most U.S. issuers. Transaction costs are generally higher than those in the United States and expenses for custodial arrangements of foreign securities may be somewhat greater than typical expenses for custodial arrangements of similar U.S. securities. Some foreign governments levy withholding taxes against dividend and interest income. Although in some countries a portion of these taxes are recoverable, the non-recovered portion will reduce the income received from the securities comprising the portfolio.

10. Other:

At July 31, 2021, 42% of Institutional Class Shares outstanding were held by two record shareholders each owning 10% or greater of the aggregate total shares outstanding. These shareholders are comprised of individual shareholders and omnibus accounts that were held on behalf of various individual shareholders.

In the normal course of business, the Fund enters into contracts that provide general indemnifications. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be established; however, based on experience, the risk of loss from such claims is considered remote.

11. Subsequent Events:

Management has evaluated the need for disclosures and/or adjustments resulting from subsequent events through the date the financial statements were issued. Based on this evaluation, no disclosures and/or adjustments were required to the financial statements as of July 31, 2021.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Trustees of The Advisors' Inner Circle Fund II and
Shareholders of Reaves Utilities and Energy Infrastructure Fund

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of Reaves Utilities and Energy Infrastructure Fund (the "Fund") (one of the series constituting The Advisors' Inner Circle Fund II (the "Trust")), including the schedule of investments, as of July 31, 2021, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the financial highlights for each of the five years in the period then ended and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund (one of the series constituting The Advisors' Inner Circle Fund II) at July 31, 2021, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and its financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements are the responsibility of the Trust's management. Our responsibility is to express an opinion on the Fund's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Trust in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Trust is not required to have, nor were we engaged to perform, an audit of the Trust's internal control over financial reporting. As part of our audits we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of July 31, 2021, by correspondence with the custodian. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

The logo for Ernst & Young LLP, featuring the company name in a stylized, cursive script font.

We have served as the auditor of one or more Reaves Asset Management investment companies since 2005.

DISCLOSURE OF FUND EXPENSES (UNAUDITED)

All mutual funds have operating expenses. As a shareholder of a mutual fund, your investment is affected by these ongoing costs, which include (among others) costs for portfolio management, administrative services, and shareholder reports like this one. It is important for you to understand the impact of these costs on your investment returns.

Operating expenses such as these are deducted from a mutual fund's gross income and directly reduce its final investment return. These expenses are expressed as a percentage of a mutual fund's average net assets; this percentage is known as a mutual fund's expense ratio.

The following examples use the expense ratio and are intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with those of other mutual funds. The examples are based on an investment of \$1,000 made at the beginning of the period shown and held for the entire period (February 1, 2021 to July 31, 2021).

The table on the following page illustrates your Fund's costs in two ways.

- **Actual Fund Return.** This section helps you to estimate the actual expenses after fee waivers that your Fund incurred over the period. The "Expenses Paid During Period" column shows the actual dollar value expense cost incurred by a \$1,000 investment in the Fund, and the "Ending Account Value" number is derived from deducting that expense cost from the Fund's gross investment return.

You can use this information, together with the actual amount you invested in the Fund, to estimate the expenses you paid over that period. Simply divide your actual account value by \$1,000 to arrive at a ratio (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply that ratio by the number shown for your Fund under "Expenses Paid During Period."

- **Hypothetical 5% Return.** This section helps you compare your Fund's costs with those of other mutual funds. It assumes that the Fund had an annual 5% return before expenses during the year, but that the expense ratio (Column 3) for the period is unchanged. This example is useful in making comparisons because the Securities and Exchange Commission requires all mutual funds to make this 5% calculation. You can assess your Fund's comparative cost by comparing the hypothetical result for your Fund in the "Expenses Paid During Period" column with those that appear in the same charts in the shareholder reports for other mutual funds.

DISCLOSURE OF FUND EXPENSES (UNAUDITED)

Note: Because the hypothetical return is set at 5% for comparison purposes —NOT your Fund's actual return — the account values shown may not apply to your specific investment.

	Beginning Account Value 2/1/2021	Ending Account Value 7/31/2021	Annualized Expense Ratios	Expenses Paid During Period*
Actual Fund Return				
Institutional Class Shares	\$1,000.00	\$1,115.70	1.30%	\$6.82
Hypothetical Fund Return				
Institutional Class Shares	\$1,000.00	\$1,018.35	1.30%	\$6.51

* Expenses are equal to the Fund's annualized expense ratio multiplied by the average account value over the period, multiplied by 181/365 (to reflect the one half year period).

REVIEW OF THE LIQUIDITY RISK MANAGEMENT PROGRAM (UNAUDITED)

Pursuant to Rule 22e-4 under the 1940 Act, the Fund's investment adviser has adopted, and the Board has approved, a liquidity risk management program (the "Program") to govern the Fund's approach to managing liquidity risk. The Program is overseen by the Fund's Liquidity Risk Management Program Administrator (the "Program Administrator"), and the Program's principal objectives include assessing, managing and periodically reviewing the Fund's liquidity risk, based on factors specific to the circumstances of the Fund.

At a meeting of the Board held on May 19, 2021, the Trustees received a report from the Program Administrator addressing the operations of the Program and assessing its adequacy and effectiveness of implementation for the period from January 1, 2020 through December 31, 2020. The Program Administrator's report included an assessment of how market conditions caused by the COVID-19 pandemic impacted the Fund's liquidity risk during the period covered by the report. The Program Administrator's report noted that the Program Administrator had determined that the Program is reasonably designed to assess and manage the Fund's liquidity risk and has operated adequately and effectively to manage the Fund's liquidity risk during the period covered by the report. The Program Administrator's report noted that during the period covered by the report, there were no liquidity events that impacted the Fund or its ability to timely meet redemptions without dilution to existing shareholders. The Program Administrator's report further noted that no material changes have been made to the Program during the period covered by the report.

There can be no assurance that the Program will achieve its objectives in the future. Please refer to the prospectus for more information regarding the Fund's exposure to liquidity risk and other principal risks to which an investment in the Fund may be subject.

NOTICE TO SHAREHOLDERS (UNAUDITED)

For shareholders who do not have a July 31, 2021 taxable year end, this notice is for informational purposes only. For shareholders with a July 31, 2021 taxable year end, please consult your tax adviser as to the pertinence of this notice. For the fiscal year ended July 31, 2021, the Fund is designating the following items with regard to distributions paid during the year.

Return of Capital	Long-Term Capital Distributions	Ordinary Income Distributions	Total Distributions	Qualifying for Corporate Dividends Received Deduction (1)	Qualifying Dividend Income (2)	Qualifying Business Income (3)	Interest Related Dividend (4)	Short-Term Capital Gains Dividends (5)
0.00%	25.76%	74.24%	100.00%	100.00%	100.00%	0.00%	0.00%	0.00%

- (1) Qualifying dividends represent dividends which qualify for the corporate dividends received deduction and is reflected as a percentage of ordinary income distributions (the total of short-term capital gain and net investment income distributions).
- (2) The percentage in this column represents the amount of "Qualifying Dividend Income" as created by the Jobs and Growth Tax Relief Reconciliation Act of 2003 and is reflected as a percentage of ordinary income distributions (the total of short-term capital gain and net investment income distributions). It is the intention of the Fund to designate the maximum amount permitted by law.
- (3) The percentage of this column represents that amount of ordinary dividend income that qualified for 20% Business Income Deduction.
- (4) The percentage in this column represents the amount of "Interest Related Dividend" and is reflected as a percentage of ordinary income distribution. Interest related dividends are exempted from U.S. withholding tax when paid to foreign investors.
- (5) The percentage in this column represents the amount of "Short-Term Capital Gain Dividends" and is reflected as a percentage of short-term capital gain distributions that are exempted from U.S. withholding tax when paid to foreign investors.
